Abstract

The research object of the present text focuses on Slovenian masculine proper names of Latin origin. The main aim is to present a comprehensive list of these names, as well as to check their initial meaning. The anthroponyms under research are divided into three major groups according to: 1) the type of the Latin name, from which the Slovenian one is derived; 2) their derivation, i. e. the type of the basic word, used during the process of name coining, as a part of speech; 3) the canonization of the studied names.

Keywords: *anthroponym, proper name, Latin origin, derivation, canonization*

Rezumat

În articol, se supun inventarierii și clasificării după anumite principii numele proprii de bărbați din cultura Sloveniei, care au origine latină. Scopul publicației este prezentarea listei complete a acestor nume și a originii lor. În cazul când numele date provin de la nume comune, se indică și analizează semnificația acestora. Prezentarea unităților din slovenă se face ținânduse cont atât de originea lor latină, modelul derivațional, cât și de canonizarea lor.

Cuvinte-cheie: *antroponim, nume propriu, origine latină, derivare, canonizare*

Introduction

The research object of the present text is constituted of the 182 Slovenian masculine proper names of Latin origin. The main aim is to present a comprehensive list of these names, as well as to check their initial meaning.

The anthroponyms under research are divided into three major groups according to:

(1) the type of the Latin name, from which the Slovenian one is derived;

(2) their derivation, i. e. the type of the basic word, used during the process of name coining, as a part of speech;

3) the canonization of the analyzed names.

It is very important to be underlined that the second classification is done according to the Latin grammatical rules.

1. Classification of Slovenian Masculine Proper Names According to the Type of the Basic Latin Name

According to the type of the basic Latin name, we distinguish six types of Slovenian masculine proper names, such as:

- Slovenian masculine proper names, derived from a Roman mythological name:

Honor (< Honor/Honos), *Libero* (< Leber/Liber), *Remus* (< Remus), *Romulus* (< Romulus), *Silván* (< Silvanus) etc.

Conclusions

In the classification according to the basic Latin origin name, six subgroups are formed – Slovenian masculine proper names derived from Roman mythological name, Roman praenomen, Roman gentile name, Roman cognomen, Roman agnomen, Neolatin name.

The biggest group of Slovenian male anthroponyms is that derived from a Neolatin name, while the smallest one is the group, including names derived from a Roman agnomen.

In the second classification, according to the type of the basic Latin word, from which the Latin name, and respectively the Slavonic one, is coined, there are eight groups: from a proper noun, from a noun, from an adjective, from a verboide, from a case construction, from a syntagm, from a unit with unknown meaning, from a unit with more than one possible etymology.

The biggest is the last presented group, while the fourth, the fifth, and the sixth include only one example each.

The classification according to the canonization criterion includes: names of orthodox saints (the smallest group), names of catholic saints, names of saints canonized by both churches (the biggest of the three groups).
