**Abstract**

*The present text aims to study the newest anthroponymic trends, and in particular, the new variants of traditional foreign given names, part of the onomasticon, in four of the most important and big settlements in Northern Bulgaria – Pleven, Veliko Tarnovo, Ruse, and Varna. Official statistical data of the National Statistical Institute (NSI) in the Republic of Bulgaria for a 10-year period (2008-2018) is used.*

**Keywords:** *Bulgarian traditional foreign given name, new variants of traditional foreign given name, Pleven, Varna, Ruse, Veliko Tarnovo, Northern Bulgaria settlement*

**Rezumat**

*În articol, ne propunem să studiem cele mai noi tendințe antroponimice și, în special, noile variante ale numelor tradiționale străine, care fac parte din onomasticonul a patru dintre așezările importante și mari din nordul Bulgariei – Pleven, Veliko Tarnovo, Ruse și Varna. Se utilizează datele statistice oficiale ale Institutului Național de Statistică (INS) din Republica Bulgaria pentru o perioadă de 10 ani (2008-2018).*

**Cuvinte-cheie:** *nume bulgare venite din alte limbi; variante noi ale numelor venite din alte limbi, Plevna Varna, Ruse, Veliko Târnovo, așezare din Bulgaria de Nord*

**I. Introduction**

The present text is part of a bigger research on the contemporary trends in name-giving in some of the biggest Bulgarian settlements under the project “Personal Names in Bulgaria in the Beginning of the 21<sup>st</sup> Century”, developed by scholars from the Institute for Bulgarian Language, the Bulgarian Academy of Sciences, Onomastic Section and financed by the National Science Fund of the Republic of Bulgaria.

The focus here is on new variants of traditional Bulgarian proper nouns entering the onomasticon due to the strong influence of the so-called international names preferred by parents nowadays all over Europe.

The research object consists of the mentioned above onyms officially registered by the National Statistical Institute (NSI) in the Republic of Bulgaria

---

<sup>1</sup>The present study is conducted under the project “Personal Names in Bulgaria in the Beginning of 21<sup>st</sup> Century” with the support of the National Science Fund of the Republic of Bulgaria, Grant N<sup>o</sup> KPI-06-H-40/10, 10 December 2019.

for a 10-year period (2008-2018) in the biggest towns in North Bulgaria, Pleven, Ruse, Veliko Tarnovo, and Varna.

The main aim is their positioning in the top 15 lists with masculine and feminine proper nouns to be followed and compared with the traditional forms of the same foreign anthroponyms.

Part of the investigation are only the names with 3 and more references in the official statistical data in accordance with the personal data protection and the Law on Statistics of the Republic of Bulgaria (Vlahova-Angelova, 2021, p. 187) and that is the reason why there are some gaps in the chart tables.

It is important to mention that it is obvious that in many cases a given name included in the table has the same frequency of usage as others. Due to it, the top 15 list does not contain every forename recorded and a phenomenon is observed that all the forenames officially registered are part of the chart, with the exception of those with a single or dual reference.

The new variants of traditional foreign anthroponyms, which are the object of the present research, are given in bold in the tables below.

The methodology used is developed by Anna Choleva-Dimitrova and Borjan Yanev and presented in their work of 2015 entitled “Съвременната българска антропонимна система (мода на личните имена)”, ч. 1. It is a “corpus-based empirical study” on the NSI official data (Choleva-Dimitrova & Dancheva, 2018, p. 122).

## II. Pleven Given Name Data Analysis

## VI. Conclusions

As it was mentioned in the initial part of the article, the data includes the most preferred 15 given names in the biggest settlements in the Northern part of Bulgaria and the new variants of traditional foreign given names are in the focus of interest.

Each settlement may be described in short with the features it possesses – Veliko Tarnovo used to be the capital of the country and is situated in the

middle of the country, close to Pleven, Ruse is on the Danube bank, Varna is on the seaside. All the four towns are big tourist, university and cultural centers.

It is surprising that the researched anthroponyms are less in number in Varna, that is a bigger settlement, if compared with the other three, where an important international port and airport are situated, so the influence of foreign cultures is stronger than in Veliko Tarnovo and Pleven, for instance, where traditions are supposed to be more solid.

The given names included in the researched lists are under the influence of the most popular names for boys and girls in Bulgaria. All of them are in accordance with the religious traditions in the country – the majority of them are names of saints worshiped by the Orthodox Church. Feminine variants are more numerous and various than the masculine ones.
